

Relocation of the Blood Sciences into the newly refurbished laboratory at St. Richard's Hospital. AMA scope included full MEP services design.

Client: Kier
Value: £1 million
Date: 2014

Challenges involved designing above ground drainage systems in an existing hospital building to service new haematology analyser.

AMA public health services design include detailed design of above ground drainage, domestic hot and cold water services and rain water system.

AMA method included thorough visual surveys to create detailed existing services drawings. Close liaison with contractor on site was imperative for final setting out.

Key points:

- Above ground drainage, domestic hot and cold water services and rain water systems
- Existing hospital building
- Thorough visual surveys
- Close liaison with contractor
